

Chit 17 — MySQL: emp Table with Constraints, Index, View

Table Creation with Constraints

```
CREATE TABLE emp (  
  Eno      INT AUTO INCREMENT PRIMARY KEY,  
  Ename    VARCHAR(50) NOT NULL,  
  Address  VARCHAR(100) DEFAULT 'Nashik',  
  Joindate DATE  
);  
  
-- MySQL AUTO INCREMENT starts from 1 by default;  
-- To start from 101:  
ALTER TABLE emp AUTO_INCREMENT = 101;
```

Add Post field after creation

```
ALTER TABLE emp ADD Post VARCHAR(50);
```

Insert sample data

```
INSERT INTO emp (Ename, Address, Joindate, Post) VALUES  
  ('Amit', 'Pune', '2022-01-10', 'Manager'),  
  ('Sneha', 'Nashik', '2021-06-15', 'Developer'),  
  ('Ravi', DEFAULT, '2020-03-20', 'Tester');  
  
SELECT * FROM emp;
```

Create Index on Ename

```
CREATE INDEX idx_ename ON emp(Ename);  
SHOW INDEX FROM emp;
```

Create View (Ename and Salary)

```
-- Add Salary column first if not present  
ALTER TABLE emp ADD Salary DECIMAL(10,2);  
  
UPDATE emp SET Salary=50000 WHERE Eno=101;  
UPDATE emp SET Salary=40000 WHERE Eno=102;  
UPDATE emp SET Salary=35000 WHERE Eno=103;  
  
CREATE VIEW emp_view AS  
SELECT Ename, Salary FROM emp;  
  
SELECT * FROM emp view;
```
